Career Objective

Computer Science student with a concentration in Cybersecurity, experienced in many languages, web development, and IT consulting. Currently, I am a software engineering intern with a strong foundation in data automation and security practices. Seeking summer internship opportunities in cybersecurity or biotech where I can apply my skills in problem-solving and secure software development.

Skills & Tools

- **Languages:** Python, Java, C++, JavaScript, HTML, CSS
 - **Web/Dev Tools:** React, Node.js, MongoDB, Git, VS Code
 - **Cyber Tools:** Linux, Bash
 - **Soft Skills:** Team collaboration, adaptability, analytical problem-solving
-

Projects

- **Google Workspace & Basecamp Backup Automation** – Built a Python script to automate secure data backups, streamline operations, and improve data integrity.
 - **Company Website & Form System** – Designed and developed the company website, implemented responsive design, and built secure form systems for user data collection.
 - **Multiplayer Game Web App** – Developed a real-time multiplayer game website with React frontend and Node.js/MongoDB backend.
 - **SnakeCoin Blockchain** – Created a simplified blockchain in Python, demonstrating data immutability and secure chaining.
-

Experience

- **Software Engineer Intern** — *Tanoshi (Remote)* — Jan 2025 - Present
 - Automated backup processes and improved operational workflows.
- **Technology Consultant** — *Third Wave Psychotherapy* — Apr 2023 - Present
 - Built and maintained technical systems for operations and UX upgrades.

- **Lifeguard** — *Raging Waters* — Jun 2021 - Sep 2021
 - Provided safety and first response as part of a 100+ person team.
-

Achievements

- **National Cyber League** – Competed in cryptography, network forensics, and ethical hacking challenges.
 - **CyberSEED 2025**—Competed in ethical hacking capture-the-flag challenges with a team and placed 23rd nationally out of all U.S. college teams.
 - **Certifications:** Verizon Cloud Platform Internship, Mastercard Cybersecurity Simulation
 - **In Progress:** CompTIA Security+
-

Education

- **George Fox University** — Newberg, OR
B.S. in Computer Science, Cybersecurity Concentration
Expected Graduation: May 2027
